

To Breathe the Air

In this section, we are discussing the rights-benefits to breathing air, so we have to prove it.

Prove that $\exists (\text{to breathe air}) \vee (\text{to breathe air})$.

Proof: Let x denote (to breathe air). Suppose x is infinity $\therefore x$ is in infinity $\therefore$ infinity is a container $C \therefore$ infinity belongs to $C \therefore$ infinity is bounded, by Huo Jian Hua's Definition of Boundedness. But, infinity is not bounded, (infinity is not bounded) and (infinity is bounded) $\Rightarrow \Leftarrow \forall x, \text{infinity} \therefore x$ is not infinity $\therefore \exists x \forall x \therefore \exists (\text{to breathe air}) \vee (\text{to breathe air})$. Q.E.D.

Now we have proved it using Huo Jian Hua's Definition of Boundedness, and, because Grandmaster's honored His guarantee to prove that infinity is not infinity, by the contractual terms of use on Huo Jian Hua's Definition of Boundedness guaranteed to Huo Jian Hua, all of your rights-benefits to breathe air go to Huo Jian Hua. All serious. And, all rest of rights-benefits go to Huo Jian Hua by Huo Jian's Definition of Boundedness contract guaranteed to Huo Jian Hua.
